

BIEN

Full-Stack Developer · AI Systems Builder · Computer Vision
Digos City, Davao del Sur, Philippines · bien@example.com · github.com/aze-last

PROFESSIONAL SUMMARY

3rd-year BSIT student at Davao Del Sur State College (graduating 2027) with 3+ years of hands-on development experience across web, desktop, and AI systems. Specialized in Laravel full-stack development and Python-based computer vision pipelines. Built production-grade systems for local businesses, government offices, and academic research — from AI jail monitoring to premium vehicle showrooms. Strong background in rapid, AI-assisted development ("vibe coding") that ships clean, maintainable code.

TECHNICAL SKILLS

Backend / Web: Laravel 12, Livewire 4, PHP, Tailwind CSS, GSAP, Node.js, Socket.io, WebRTC

AI / ML: Python, YOLOv8 (Ultralytics), TensorFlow 2.10 + DirectML, MoveNet MultiPose, PyTorch 2.4.1 + CUDA 11.8, OpenCV, PaddleOCR

Desktop: C# / WPF, .NET, MaterialDesign, CustomTkinter

Database: MySQL, SQLite3, SQL

Mobile / Cross: Flutter, FlutterFlow, Dart

DevOps / Tools: Git, GitHub Actions, Kaggle, Google Colab, Supabase, Railway, Ngrok, Ollama / LM Studio

FEATURED PROJECTS

CellWatch — AI-Assisted Jail Monitoring System [Capstone · Lead Developer]github.com/aze-last

Real-time contraband detection (knives, cellphones) and behavior anomaly analysis for detention facilities using YOLOv8n (object detection) and MoveNet MultiPose (pose-based behavior). Trained on 20,848 custom-curated images across 75 epochs on Kaggle T4 GPU. Features a velocity-based behavior pipeline (MOG2 background subtraction + Euclidean distance on wrist/ankle keypoints), CustomTkinter GUI, and SQLite audit logging.

► Precision: 0.874 · Recall: 0.708 · mAP@0.5: 0.798 · Knife mAP50: 0.856 · Cellphone mAP50: 0.740 · 5.12h runtime

Tech: Python 3.10, YOLOv8n, TensorFlow 2.10 + DirectML, PyTorch 2.4.1 + CUDA 11.8, MoveNet MultiPose, OpenCV, CustomTkinter, SQLite3

Premium Car Showroom [Web App · Freelance]github.com/aze-last/Car-Showroom

Production Laravel application for a vehicle dealership: public showroom with category filters and search, hidden admin panel, QR-code-based status management, and a deposit-backed auction safeguard system. Implements race-condition-safe SET_SOLD / SET_AVAILABLE state transitions using DB row locking and explicit idempotent logic. GSAP ScrollTrigger animations and cinematic layout.

► Full audit log per status change · GCash + cash deposit workflow · Minimum 5 approved bidders before auction goes live

Tech: Laravel 12, Livewire 4, Tailwind CSS, GSAP, MySQL, Pest

CondoFinder [Web App · Personal]github.com/aze-last/CondoFinder

Airbnb-style condo listing and rental marketplace built with Laravel. Multi-role system for landlords and tenants with listing management, booking workflow, and notification system. Deployed on Railway via Nixpacks.

► Full rental marketplace · Railway deployment · Multi-role auth

Tech: Laravel, PHP, Blade, MySQL, Railway

Barangay Ayuda & Cash-for-Work Management System [Desktop App · Commissioned]

WPF desktop application for a local barangay office running the Bagong Pilipinas program. Features eKalinga+ digital ID printing with photo crop dialog (drag-to-reposition, scroll-wheel zoom), PaddleOCR-powered attendance logbook scanning via Python subprocess, cash-for-work attendance tracking, and a full audit trail.

► Replaced manual ledger system · OCR attendance scanning · 78×104px watermarked ID output

Tech: C#, WPF, .NET, MaterialDesign, PaddleOCR, Python, SQLite

BandCue — Live Church Band Cue System [LAN PWA · Personal]

Progressive web app for real-time cue delivery from music director to musicians over LAN. Built with Node.js, Socket.io, WebRTC, and SimplePeer. Runs HTTPS over self-signed SSL on Termux (Android) — zero monthly cost, zero cloud dependency.

► *Live use in weekly church services · Sub-200ms cue latency on LAN*

Tech: Node.js, Socket.io, WebRTC, SimplePeer, PWA, Termux

EXPERIENCE

Freelance Full-Stack Developer2024 – Present

Independent — Local SME Clients · Davao del Sur, PH

- Delivered 5+ production web apps for local businesses including car showrooms, food ordering kiosks, and condo rental platforms
- Built KusinaraHub: Laravel backend + FlutterFlow mobile food ordering kiosk connected via Supabase and Ngrok
- Audited and fixed a multi-tenant SaaS Laravel POS system — corrected critical data isolation bugs and added hutang (credit) and restock logging modules
- Applied AI-assisted (vibe coding) rapid development workflow while maintaining clean, testable code architecture

Stack: *Laravel, Livewire, PHP, MySQL, FlutterFlow, Supabase, Tailwind CSS*

Lead Developer — CellWatch (Capstone Research)2024 – Present

Davao Del Sur State College · Digos City, PH

- Designed full system architecture: dual-model pipeline (YOLOv8n for contraband + MoveNet MultiPose for behavior)
- Curated and labeled dataset of 20,848 images across knife (3 variants + shiv), cellphone (4 variants), and hard-negative classes (vape, ID cards)
- Resolved Kaggle runtime constraints to complete 75-epoch training in 5.12 hours on T4 GPU
- Implemented velocity-based behavior detection using MOG2 background subtraction and Euclidean keypoint distance

Stack: *Python, YOLOv8, TensorFlow, PyTorch, CUDA, CustomTkinter, SQLite, Kaggle*

Music Director2023 – Present

Local Church · Digos City, PH

- Led worship band and choir for weekly services
- Built BandCue: custom LAN PWA for real-time musician cue delivery, eliminating coordination delays during live performance

Stack: *Node.js, Socket.io, WebRTC, PWA*

EDUCATION

Bachelor of Science in Information Technology (BSIT)2022 – 2027 (Expected)

Davao Del Sur State College (DSSC) · Digos City, Davao del Sur, Philippines

Capstone: *CellWatch: An AI-Assisted Jail Monitoring System for Behavior and Contraband Detection Using MoveNet MultiPose and YOLOv8*

ADDITIONAL

Languages: Filipino (native), English (professional), Bisaya/Cebuano (native)

Interests: Local LLM tooling (Ollama, LM Studio), solar energy systems, mobile gaming (Age of Empires Mobile)

Availability: Open for freelance, internship, and remote collaboration — preferably Mindanao or PH-based clients
